

YOU DO THE MATH.....
IT MAKES DOLLARS AND CENTS TO RECYCLE...

Take a look at what it costs for trash services according to one local waste hauler's pricing. A 96 gallon trash tote holds 6 kitchen trash bags & costs \$19 per month, \$57 per quarter, = \$228 per year

Budget Bags (pay as you throw) holds 33 gallons or 2 -3 kitchen trash bags and costs \$3.00 each (\$30 per box of 10)

By recycling, the amount of trash generated is reduced. You could cancel the trash tote and buy budget bags instead!

If you use one budget bag every week for trash and recycle what you can, you will be paying \$156 per year for waste disposal. That's a savings of \$72 per year!

If you use one budget bag every 2 weeks for trash and recycle what you can, you will be paying \$78 per year for waste disposal. That's a savings of \$150 per year!

If you use one budget bag every 3 weeks for trash and recycle what you can, you will be paying \$39 per year for waste disposal. That's a savings of \$189 per year!

Recycling is the GREEN thing to do.....

Save resources, landfill space, and money! Let's keep the green in our own pockets instead of throwing it away!
